- Activation card

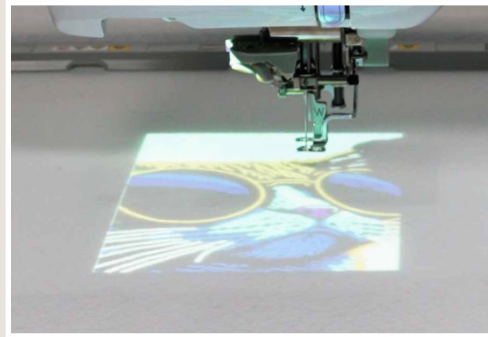

Find out more

Brother's largest ever magnetic embroidery hoop

The 408 x 272mm (16" x 10 5/8") frame has been made exclusively for the Brother Aveneer EV1. Constructed from carbon fibre resin, it's stronger, lighter and features flat magnets for ease of use.

Pattern Projection+

The Brother Aveneer EV1 upgrade kit includes an exclusive upgrade to your machine's projector function. The Pattern Projection+ feature moves the embroidery frame while projecting your full chosen embroidery design onto your fabric enabling you to check the whole pattern layout before you start stitching out.

Matrix copy function

Make light work of repeated patterns with the Matrix Copy function. Use the function to stitch multiple copies of the same design in one hoop. Save time with smart pattern placement for maximum copies and auto thread sorting for fewer thread changes.

Trapunto-style quilting designs

Inspired by the art of Italian quilting, the EV1 upgrade kit brings you 22 Trapunto-style quiltbroidery designs, so you can add a classic finish to your quilting.

Edge-to-edge quilt patterns

Expand your EV1's edge-to-edge library with 5 more quilting patterns. These aren't available anywhere else!

French Knot embroidery

Embrace centuries of craft heritage with the new French Knot embroidery patterns from Brother. Released as a new feature for 2026, these 10 raised designs will add an extra dimension to your work.

Crochet coupling patterns

Can't crochet? No worries! With 7 crochet coupling patterns you too can have fun with yarn and your Aveneer EV1.

13 embroidery patterns

Enhance your embroidery output with 13 exclusive embroidery patterns, including 11 patterns that ONLY fit the EV1's super large embroidery frame. Also including the Baby Quilt designs – acting like a template, you can choose from a variety of colour templates and add preferred text with built-in fonts for personalisation.
