- Enhanced realistic stitch preview
- Customised stitch types for professional digitising such as colour gradation, radial stitches, spiral stitches, motif patterns, embossed fills random walking stitch and more
- Realistic Preview and Stitch Simulator shows how the design will be sewn out on screen before you start stitching
- Image size and position can be changed by wizard when stitching a photograph
- Improved import and merge/remove overlap functions
- New freehand tool in layout and editing
- Auto Punch function quickly converts PC graphic files to embroidery data
- 35 built-in fonts with support for TrueType fonts and Monogramming
- 5 styles of small font (3-6mm)
- Font Creator for designing your own lettering
- Easy selection and editing of the sewing order and colours
- New support for 13 embroidery data formats
- Compatible with all Brother embroidery machines
- 2 year return to base warranty

Creating your own individual embroidery designs is now easier than ever before with the PE-Design version 8 software. With over 500 built-in PES data, PED v8 helps you create unique and high quality designs, allowing you to be really creative.

The all-in-one toolbar allows all of the features to be available instantly allowing you to change thread colours, fonts and add motifs to stippling quickly and easily. It really does have some great time saving features.

Print & Stitch allows you to print a design onto fabric and then embroider your chosen design over the top.

The enhanced font creator and underlay stitches make producing professional projects simple and you can now design your embroidery patterns manually or automatically using 'Beginner' or 'Expert' mode.
