Model	V3
Series	V Series
Category	Upgrade kit UGKV1

We have seen an increase in customers wrongly downgrading their machine during the installation process for UGKV1.

The installation wizard is 3.03, downgrading from a later version could damage the machine. All DHL stock has been reworked with the below label on the front of the box

IMPORTANT

Please do not install
3.03 from the CD wizard
if your firmware version is higher than 3.03

Please scan the QR code for instructions on how to check your firmware version
for your machine
contact ukcustomersupport@brothersewing.eu should you require assistance

Should you have stock without this label attached you can either print out the label above and attach to the box or contact ukcustomersupport@brothersewing.eu and we will provide labels to you.

The installation wizard for upgrade kit 1 UGKV1 has firmware version 3.03.

- Introduction
- Download Latest Program/Manual**
- Enter CD Key
- Enter Machine Number(No.)
- Check Entered Information
- Certification Key Obtained

Download Latest Program

The program on your sewing machine needs to be upgraded to the the latest version so that new functions for KIT can be used. Please download it from below and upgrade to the latest version. After downloading it, click the **[Next]** button.

Check your model and click the **[Download]** button:

- VM6200D **Ver. 3.03** 52.0MB
- V7/V5/VM5100 **Ver. 3.03** 52.9MB
- VE2200/BP2100/V3 **Ver. 3.03** 51.9MB

For updating program, refer to the Installation Guide.

If your Version number is 3.03 or higher then you do not need to update the machine from the installation wizard to use your new upgrade kit.

To check the version of your machine, press the settings page on the machine.

for the latest firmware for your machine please visit the relevant link for your machine as installing a previous version could harm your machine.
