

JANOME HORIZON Memory Craft 15000 Quilt Maker

	<p>Stitch Tapering Function- Mirror image is available in Tapering mode (Mirror image for pattern, needle position and tapering angle). Tapering angle mirror image is Janome's original idea. Tapering angle and cycle (number of patterns) can be saved in 'save favourite setting' It is now possible to set the number of cycles by typing the number in or +/- . On-screen quick reference chart-pattern can be selected directly from chart. There is also a pattern preview screen.</p>
	<p>Ruler Work Foot- This new foot is designed to achieve beautiful quilting effects:</p> <ul style="list-style-type: none"> • Full metal foot for high durability • V-shaped gap improves visibility whilst stitching • Ruler Work Mode is available through the Quilting category in Sewing Application <p><i>For use with quilting rulers (template) high shank models or Long Arm quilting machines (4.5mm- 6.35mm thickness)</i></p>
	<p>Professional Grade Foot and needle Plate (HP) Utilise this narrow gauge industrial type foot for curves and precise topstitching and experience the great ease of control and superior visibility it offers. Industrial type sewing machines have 3 lines of feed dogs-Janome have created this foot to sit on the left 3 lines of feed dogs as shown.</p> <p>It's also perfectly sized for creating 1/4" seams. This foot will surely become a go-to item for accurate piecing even on curves and small pieces of fabric!</p> <p><i>Straight stitch in left needle position (0.5) is deemed to be best for straight stitching in terms of needle, thread and hook related timing.</i></p>
	<p>Coloured Light Progress Indicator Keep a check on your embroidery by selecting the coloured light progress indicator in the set menu. This changes the light display on the front of your machine.</p>
	<p>6 Additional types of monograms Newly added to the MC15000 – 2-letter/3-letter embroidery monograms</p>
	<p>Anti-Kink Device This device prevents the upper thread from becoming too loose and creating kinks</p>

JANOME HORIZON Memory Craft 15000 Quilt Maker

	<p>Improvements to Automatic Needle Threader Needle threading will be carried out with the needle bar in the centre needle position as well as the left position.</p> <p>To prevent the needle threader hitting the foot holder, the foot holder has been reshaped.</p> <p>Improved Plate Caulking at 2 points: To stop the thread holding plate from moving the improved catch is upward projecting to secure thread more effectively</p> <p>* For users of V2.11 or previous versions, the Quilt Maker Accessory Upgrade Kit includes the reshaped presser foot holder and embroidery foot P</p>
	<p>Fine Tuning of Locking Stitches Locking stitches can be set from 0 to 6 depending on fabric conditions. This fine-tuning of locking stitches is a great tool for quilters.</p> <p>The machine will sew fine-tuned locking stitches (0-6) at the beginning and continue sewing forward.</p> <p>When you press the reverse button at the end of the seam, the machine will sew fine-tuned locking stitches (0-6) in place, then stop sewing automatically.</p> <p>This is an excellent feature for sewing on fine and sheer fabrics</p>
	<p>Clean Bobbin Holder Message It is surprising just how much lint builds up, some threads produce more lint build up than others.</p> <p>If you set 'Clean Bobbin Holder' in your set menu you will get a message displayed every 15 hours. Keeping the bobbin area clean is really important in order for the machine to perform at its best.</p>
	<p>Custom Baste and Trace function Customise the tracing and basting size to your preference by indicating two points: the left upper corner and lower right corner.</p> <p>If you like to have basting larger than embroidery designs in order not to have needle points around the design especially using leather and vinyl type fabric, customise the basting size to your preference!</p>

JANOME HORIZON Memory Craft 15000 Quilt Maker

	<p>Embroidery Functions in 'Ready to Sew' Fine position/angle adjusting key Fine tune the design position or its angle on the screen. No need to remove the embroidery hoop from the machine.</p> <p>Adjustable range: Move designs (X and Y): -5.0 mm to 5.0 mm Rotate designs: -5.0 degrees to 5.0 degrees</p>
	<p>Embroidery 'Edit' Function 3 Zoom Levels- Select from normal, large or largest of 3 levels. 'Large' is new.</p> <p>Rotating Patterns at the edge of hoop It is now possible to rotate the pattern even when the design is placed at the edge of the hoop. If part of the pattern is outside the hoop after rotating, the pattern will be greyed out. However it is possible to move the position of the hoop and continue editing.</p> <p><i>Previously, if part of the pattern was outside the hoop, there would be a warning sound and the pattern could not be rotated.</i></p>
	<p>Embroidery Settings Locking stitch ON/OFF function This is to insert a locking stitch after each colour change and/or thread trimming to secure threads.</p> <p>A. After each colour change (default setting: OFF) B. After thread trimming (default setting: ON)</p>

MC15000 Quilt Maker Accessory Upgrade Kit for V2.11 and previous models

Quilt Maker Accessory Upgrade Kit for V 2.11 and previous versions

Any version of MC15000 prior to Quilt Maker (V3.0) must be updated with "USB Flash Drive with update software" before using this accessory kit. Failure to update can result in machine malfunction which may result in injury. Please change the presser foot holder and embroidery foot from previous versions to those provided in this kit. The automatic needle threader may not work properly if the presser foot holder and embroidery foot are not changed.
