DC4030

Clear and Simple Button Navigation for Direct Pattern Selection

The DC4030 control panel, with its intuitive design and two stitch options per button, lets you adjust your sewing very quickly. All of the stitch selection buttons light up when selected, and buttons are large and especially easy to navigate.

Button Indicator Lights

Buttons light up to provide you with a straight-forward, user-friendly sewing experience.

Lock Stitch Button

The Lock Stitch Button lets you finish your stitching with an invisible lock stitch. When used with decorative stitches, the machine will complete the stitch selection before adding the lock stitch.

Reverse Button

The Reverse Button lets you sew in reverse. If you are in the middle of a decorative stitch, it will immediately insert a lock stitch.

Needle Up/Down Button

You can choose whether the needle always finishes in either the up or down position to suit your sewing project.

Start/Stop Button

The very convenient Start/Stop Button lets you sew without using the foot control. When you press and hold the button, your stitching will slow down for more accurate results. This button is perfect for both the beginning and the end of a stitch, and where you need a little extra control.

Adjustable Foot Pressure

This feature will let you select from four foot pressure levels to perfectly accommodate fabrics of different thicknesses. With adjustable foot pressure, it's now even easier to get consistent stitches.

One Hand Needle Threader

Thread the needle easily without eye strain using the convenient One Hand Needle Threader. Its advanced design keeps the lever in place for easy One Hand Threading. Pull the thread across the threader and watch as it is automatically fed through the eye of the needle.

Buttonhole Choices

The DC4030 provides six styles of automatic sensor buttonholes including square, rounded, keyhole, and heirloom. Drop your button onto the sliding gauge and the foot makes your buttonhole the right size every time.

Swing-Open Face Plate for Easy Cleaning

Removing lint is so easy with the convenient Swing-Open Face Plate.

Auto-Tension System

The automatic thread tension system will help you achieve perfect stitch consistency even over fabrics that are of different thicknesses.

Elongation

Lengthen stitches to add visual flair to all of your sewing projects without losing stitch density. By the combining of various patterns, you can create beautiful, original designs.

Adjustable Stitch Size

Stitch width is adjustable between 0 and 7 mm. Stitch length is adjustable between 0 and 5 mm.

Features
